## The Diamond H2O® Freedom Series Twin Water Softener Features

- Twin tank alternating design provides a reliable, continuous uninterrupted supply of softened water
- Exclusive, non-corrosive one-inch control valve with six programable cycles
- The motor driven piston is reliable under the worst water conditions
- Dual hull resin tanks stand up to UV rays, rust & corrosion
- A Large capacity brine tank with corrosion proof internal components that will endure many years of salt handling and exposure
- DHER2 Resin Media: Delivers consistent soft water under a wide range of flow rates that are common in every household
- Third Party Validation: The Diamond H2O® Freedom Series twin tank water softeners have passed the critical, detailed third party testing by TGA Laboratories which assures your Diamond H2O® water softener has been manufactured under the highest of industry standards.

## The Diamond Difference

Investing in Diamond H2O® water treatment equipment will provide you with not only solid, high quality products but also a company that takes pride in providing expert, unmatched service. For over 80 years the Diamond H2O® team has been providing enhanced water solutions to it's customers, and will continue to be on the cutting edge of developing technologies while upholding a strong, committed family-oriented business model. We welcome you, and we are here to help.
