Cabinet Water Softener

Soft Water in a Space Saving Appliance

Summary

The DROP Cabinet Water Softener is a space-saving softener ideal for applications where space is limited. With its appliance looking design, the DROP Cabinet Water Softener can be neatly installed in laundry rooms or other areas of the home where it is important to be compact and visually appealing.

Features

- Eliminates Hardness (Calcium & Magnesium)
- Demand Initiated Regeneration
- Treated Water Refill with Pre-Brine Option
- Adjustable Cycle Times
- 9V Battery Backup for Power Loss
- DROP App to Control System from Anywhere
- Water Usage Data and History
- Provides text messages, emails and/or push notifications for low salt and other system information to your smartphone.
- Proprietary two valve manual bypass with 1" MNPT Connections.
- 5 Year Warranty

Like all DROP water softeners, the Cabinet Water Softener utilizes a patented piston design that provides the ability to shut off water to the home. When paired with DROP Leak Detectors through the DROP Hub, this system provides all the benefits of a top of the line water softener, home leak protection, and a water conservation system in one.

DROP Leak Detectors

Place DROP Leak Detectors under sinks and dishwashers, behind toilets or washing machines, near your water heater, or anywhere that water might leak or collect. If a leak or freezing temperature is detected, the Leak Detector will have the DROP Cabinet Water Softener turn off your water.
